

CPSC 304 Project Cover Page

Milestone #: 4

Date: Dec 1st, 2023

Group Number: 32

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Norman Vo	54398649	z5y8p	vo.hoang.quan2003@gmail.com
Danny Ngo	10112480	a3r8j	danhngo80@gmail.com
Kaz Kianoush	96885892	o3s5g	kazkianoush03@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

Repository Link

https://github.students.cs.ubc.ca/CPSC304-2023W-T1/project_a3r8j_o3s5g_z5y8p

Within the repository in the **backend** folder, there is a file called **CPSC304Script.sql** that contains a single SQL script that is used to create all the tables and data in the database.

Copy of the schema

The data of each table in the entire database used in the demo after script initialization is attached at the end of the report

Project Description

Our project is to present core information about items in the game “Book of Hours”. This project acts as a centralized place where players can quickly look up data while playing the game. Since the game provides no tutorial to the player and most of the game mechanics are discovered through trial and error, we design this wikipedia for the player to look up the information quickly

Changes to the schema

Between milestone 2 to milestone 4 and 5, there are no changes to the schema

Queries

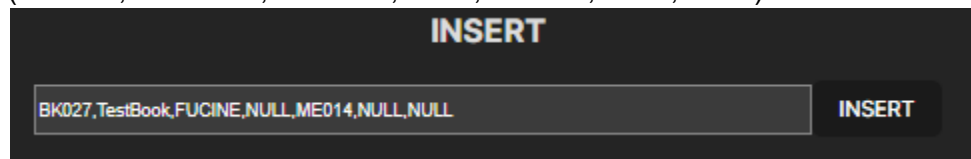

Queries: INSERT

Query was implemented in bookModel.js line 35-43 in the models folder

The API call was implemented in line 243-290 on fetchAPIInsert in inputForm.jsx in the frontend

Adds a new Book item to the wiki

```
INSERT INTO Book(bookID, bookName, language, aspectID, memoryID,
elementOfTheSoulID, numenID)
VALUES ('BK027','TestBook','FUCINE',NULL,'ME014',NULL,NULL)
```

A screenshot of a web application interface for inserting data into a database. The interface has a dark background. At the top, the word "INSERT" is displayed in a light blue, monospace font. Below it, there is a light gray rectangular input field containing the SQL query: "BK027,TestBook,FUCINE,NULL,ME014,NULL,NULL". To the right of this input field is a light blue button with the word "INSERT" in a darker blue font.

Adding a new Book into the database with the INSERT textbox and values

Book of Hour database

A video game developed by WeatherFactory

Change what can be shown using the checkboxes

Memory: Show ☐ MemoryID ☐ MemoryName ☐ MemorySources ☐ MemoryIsSound ☐ MemoryIsOmen ☐ memoryIsPersistent ☐ MemoryIsWeather ☐

Book: Show ☒ bookID ☐ bookName ☐ language ☐ aspectID ☐ memoryID ☐ numenID ☐

INSERT

UPDATE

DELETE

bookID	bookName	language	aspectID	memoryID	elementOfTheSoullID	numenID
BK279	TestBook	FUCINE		ME014		

The new table returns the book with the added values

Queries: DELETE

Query was implemented in bookModel.js line 56-59 in the models folder

The API call was implemented in line 342-365 on handleDelete method in inputForm.jsx in the frontend

Deletes a book data from the wiki using the bookID

DELETE FROM Book WHERE bookID = 'BK060'

BK060	Calicite Supplications		AS003	ME008		
BK061	On Thirstlies, Ivories And Lovelies		AS003	ME016		
BK062	The Wonderful Shape	Killasimi	AS003	ME008		
BK063	A Journey to the Grove		AS003	ME008		

Before calling DELETE on BK060

DELETE

Triggering the DELETE operation by filling out the bookID and selecting DELETE

BK055	On Matthias And the Amethyst Imago: Pursuit	Aramaic	AS003	ME017		
BK056	The Orchid Transfigurations: A Birth	Latin	AS003	ME008		
BK057	The Imitation of Skin		AS003	ME023		
BK058	Snare of the Tree: Collected Proverbs of Aunt Mopsy		AS003	ME022		
BK059	The Thirsting Tantra		AS003	ME008		
BK061	On Thirstlies, Ivories And Lovelies		AS003	ME016		
BK062	The Wonderful Shape	Killasimi	AS003	ME008		
BK063	A Journey to the Grove		AS003	ME008		
BK064	The Rose of Nuriel	Greek	AS003	ME008		
BK065	The Geminiad II	Fucine	AS003	ME008		
BK066	The Sun Disfigured	Cracktrack	AS003	ME045		ME045
BK067	One Thousand Threads		AS003	ME018		

Result of the book table after calling DELETE on BK060

Queries: UPDATE

Query was implemented in bookModel.js line 45-54 in the models folder

The API call was implemented in line 294-341 on method fetchAPIUpdate in inputForm.jsx in the frontend

Update the language of the book with ID BK054, this is useful when the new update is released to the game and changes the gameplay feature of the existing items in the game.

UPDATE Book SET language = 'Deep Mandaic' WHERE bookID = BK002

bookID	bookName	language	aspectID	memoryID	elementOfTheSouilID	numenID
BK001	The War of the Roads, 1451-1551		AS001	ME007		
BK002	De Horis Book 2	LATIN	AS001	ME007		
BK003	De Horis Book 3	LATIN	AS001	ME006		
BK004	The Sun's Lament		AS001	ME018		
BK005	The Victory Of Crowns		AS001	ME006		
BK006	De Bellis Murorum		AS001	ME006		
BK007	Exorcism for Girls		AS001	ME018		
BK008	The High Traditions of the Noble Endeavour	Latin	AS001	ME007		

Book BK002 currently has Language value as Latin

UPDATE

BK002,De Horis Book 2,Deep Mandaic

UPDATE

User updating the book with id BK002 with a new Language value

bookID	bookName	language	aspectID	memoryID	elementOfTheSouilID	numenID
BK001	The War of the Roads, 1451-1551		AS001	ME007		
BK002	De Horis Book 2	Deep Mandaic	AS001			
BK003	De Horis Book 3	LATIN	AS001	ME006		
BK004	The Sun's Lament		AS001	ME018		

Book BK002 now has Deep Mandaic as its new Language value

Queries: Selection

Queries was implemented in bookModel.js line 4-33 in the models folder

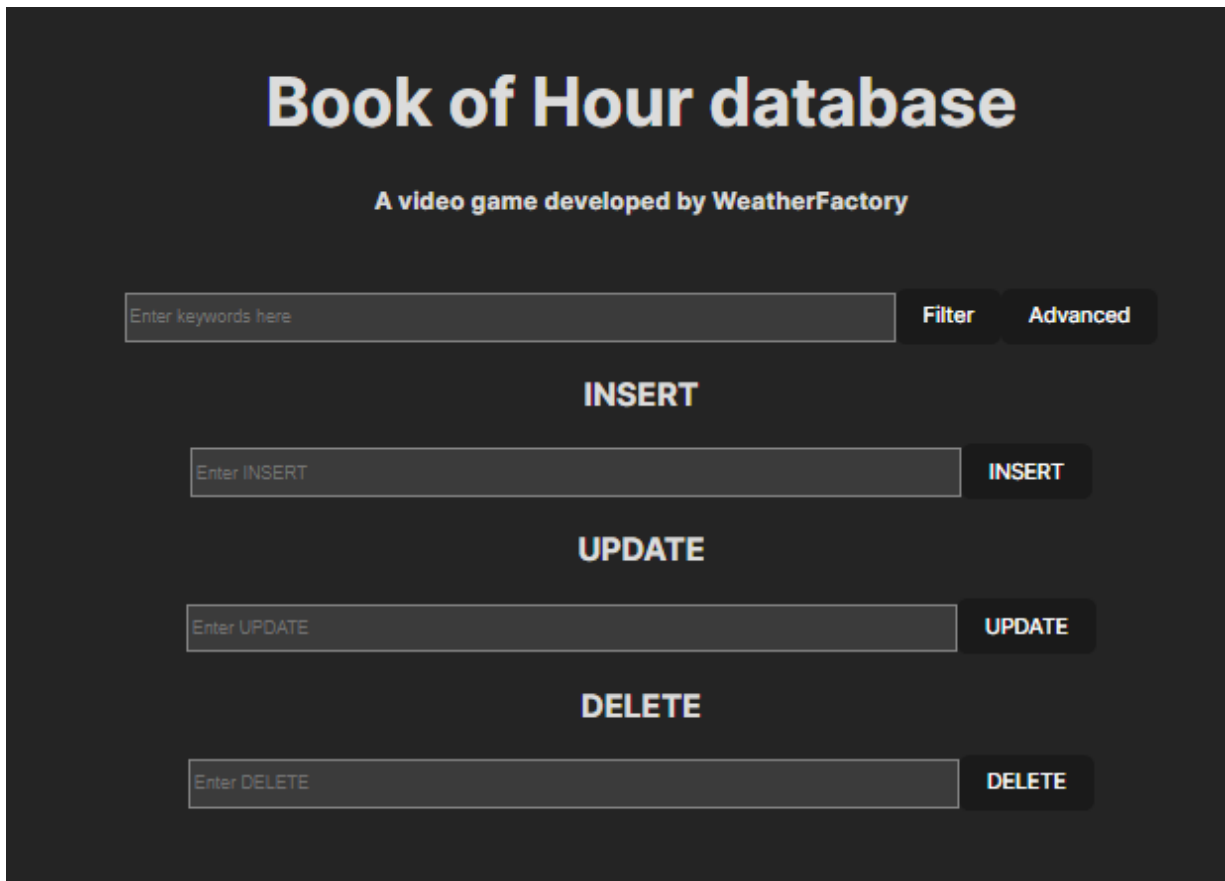

The API call was implemented in line 188-200 on inputForm.jsx in the frontend

Find the book with the name “The Iron Book”

```
SELECT *
```

```
FROM Book
```

```
WHERE bookName = 'The Iron Book' OR bookName Like 'The Iron Book'
```

The screenshot displays the 'Book of Hour database' interface. At the top, it states 'A video game developed by WeatherFactory'. Below this is a search section with a text input field containing the placeholder 'Enter keywords here', followed by 'Filter' and 'Advanced' buttons. The interface then presents four distinct sections for database operations: 'INSERT', 'UPDATE', and 'DELETE'. Each section consists of a text input field with a placeholder (e.g., 'Enter INSERT') and a corresponding action button (e.g., 'INSERT'). The 'UPDATE' section also includes an 'UPDATE' button. The entire interface is set against a dark background with light-colored text and buttons.

Find visitor by language they teach

Searching for the language “Sabazine” under the Advanced tab

peopleName	language
Dr Ibn al-Adim	Sabazine
Lt Arthur Thomas Moore (Ret.)	Sabazine

Result of the query returning all visitors who speak “Sabazine”

Queries: Aggregation with Group By

Queries was implemented in bookModel.js line 27-29 in the models folder

The API call was implemented in handleAdvancedBookSubmit method on inputForm.jsx file

Retrieve the number of books grouped by its aspect requirement in the "Book" table where the book can unlock Memory: Foresight

The presence of multiple books that provide the same memory in the game highlights an interesting aspect for players. Specifically, players can observe that the majority of books unlocking Memory:Foresight are found within forge aspect (AS002). This information can serve as a valuable clue and guide players in their search to unlock a specific memory.

```
SELECT b1.aspectID, COUNT(*) as bookCount
FROM Book b1
WHERE b1.memoryID = 'ME007' //ME007 is Memory:Foresight
GROUP BY b1.aspectID;
```

aspectID	bookCount
AS001	5
AS002	16

Result of the query after ticking the "Group aspect requirement" and filling in "Count the books that unlocks memory:"

Queries: Aggregation with Having

Queries was implemented in peopleModel.js line 27-29 in the models folder

The API call was implemented in line 150-164 on inputForm.jsx in the frontend

```
149 ~~~~~ } else if (flags[4]) {  
150 ~~~~~ console.log("girt");  
151 ~~~~~ try {  
152 ~~~~~   const allData = await Promise.all(one.map(tableName =>  
153 ~~~~~     fetch(`http://localhost:3000/people/visitors/?uniqueLanguageVisitor=true`, {  
154 ~~~~~       credentials: "include",  
155 ~~~~~       method: "GET",  
156 ~~~~~       headers: {  
157 ~~~~~         'Accept': 'application/json',

161 ~~~~~   onItemsChange(allData);  
162 ~~~~~ } catch (e) {  
163 ~~~~~   console.log(e);  
164 ~~~~~ }  
165 ~~~~~ }  
166 ~~~~~ }  
167 ~~~~~ }
```

Identify languages that have been spoken by only one visitor.

Some books in the game Book of Hours require the player to acquire a certain language. The only way to acquire that is through the visitor, and the player needs to lookup who can teach the player that language

```
SELECT v.languageID, COUNT(p.peopleName)  
FROM Visitor v, People p  
WHERE v.visitorID = p.peopleID AND v.languageID IS NOT NULL  
GROUP BY v.languageID  
HAVING COUNT(*) < 2;
```

Queries was implemented in peopleModel.js line 37-47 in the models folder

The API call was implemented in line 133-143 on inputForm.jsx in the frontend

```
133     const allData = await Promise.all(one.map(tableName =>
134       fetch(`http://localhost:3000/people/visitors/?nonLanguageTeaching=true`, {
135         credentials: "include",
136
137         method: "GET",
138
139         headers: {
140           'Accept': 'application/json',
141           'Content-Type': 'application/json',
142         },
143       }).then(response => response.json())));
144     onItemsChange(allData);
145   } catch (e) {
146     console.log(e);
147   }
148 }
```

This query shows the player all visitors that doesn't teach the player a new language skill. In this game, there are two types of visitors: visitors who teaches player a new language and visitors who doesn't/speak the same language as our protagonist. Although this only returns 1 result, this will be useful when there are more updates to the game with new characters (visitors) who doesn't necessarily teach player a new language

```
SELECT p.peopleName
FROM Visitor v, People p
WHERE NOT EXISTS (
  SELECT l
  FROM Language l
  WHERE l.languageID != v.languageID)
AND v.visitorID = p.peopleID;
```
